

PARKER CEILINGS NOW ACCREDITED
AS MEMBERS OF THE SAFE CONTRACTOR
HEALTH & SAFETY SCHEME

PLAYING IT SAFE WITH SAFE CONTRACTOR

We are now accredited by the Alcumus SafeContractor scheme which provides a health and safety audit service for contractors, enabling us to reassure our clients that health and safety is being handled correctly and sufficiently on their sites.

We know that our clients, who themselves may be working under the aegis of a much larger contractor, deem it to be vital that we have a reliable system in place to assess the suitability of arrangements made by service providers whilst we are on their premises or representing them on site.

And with ever more complex legislation placing an increasing burden on organisations to ensure the health and safety competency of contractors, we knew that we already have methods in place to satisfy our clients' requirements but this accreditation provides further evidence that we can be relied upon as a preferred supplier.

PUTTING US THROUGH OUR PACES

Under the Alcumus SafeContractor system, businesses like ours undergo a rigorous vetting process, which examines our health and safety procedures and our track record for safe practice.

Our business was deemed to meet the high standard required so now we have been included on the SafeContractor database, which is accessible to registered users only via a secure website.

From a client's perspective, SafeContractor provides evidence that contractors are meeting their relevant legal requirements, it offers increased confidence in the health and safety competence of the contractor and ensures that contractor lists are managed more effectively.

As ever, Parker Ceilings tick all those boxes. Proud to be members of the SafeContractor scheme.
